VISITOR MANAGEMENT: *Best Practices for Safety, Security and Success*

In today's unsure times, your organization faces a myriad of potential threats: crime, vandalism, industrial espionage, global terrorism, and workplace violence, among others. **The security of your employees and property are at risk every day- and it all begins at your front door.**

Now more than ever, it's vitally important to have an effective Visitor Management system that will keep the wrong people out – and create a smooth, professional experience for your welcomed visitors.

You know who is in your facility– at a moment's notice.

- Access to accurate, real-time records of non-staff personnel
- Seamless visitor documentation and an easy-to-access audit trail

You can safeguard all on-site personnel and visitors (and your regulatory compliance, too).

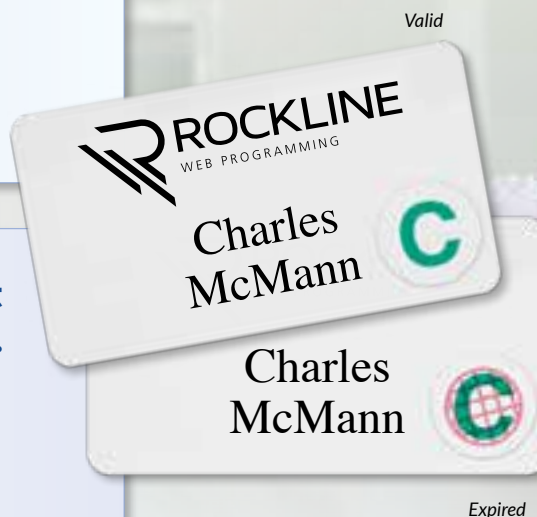

- In case of emergency, all staff and visitors can be marshaled to a safe area
- Ensures compliance with internal policies, occupational health and safety regulations, and government regulations (specific industries)

You're prepared for visitors who may not be your friends.

- Improves the overall security of your personnel and property
- Ensures unauthorized visitors are not left unsupervised with your assets (VISITOR – Escort Required)
- Creates a permanent record of meetings, dates and attendees for intellectual property disputes

You can make a powerful first impression with your visitors.

- Enhances your corporate image with a professional-looking system and badges
- Creates an efficient sign-in process (and eliminates long lines in your lobby!)
- Improves productivity and eliminates human errors
