Country of origin	China

OVERVIEW

The 2136-340X is a 5/8" (16mm) wide flat polyester lanyard made from antimicrobial MicroWeave material with a breakaway safety connector and a no-twist wide plastic hook end fitting. Total cut length is 36" (914mm) prior to assembly. The MicroWeave polyester uses nanoparticle-coated fibers that inhibit the growth of odor-causing bacteria and surface germs. The antimicrobial property is built into the material at the fiber level, not applied as a surface treatment.

KEY FEATURES

- **Width and Material:** 5/8" (16mm) flat MicroWeave polyester, 36" cut length. Nanoparticle-coated fibers inhibit surface bacteria growth built into the material, not a surface treatment.
- **No-Twist Wide Plastic Hook:** Elongated hook profile resists flipping and twisting, keeping the badge holder facing forward consistently during wear.
- **Breakaway Safety Connector:** Releases when pulled apart at the connection point for safety in pull-force environments.
- **6 Colors Available:** Black (2136-3405), Navy Blue (2136-3403), Green (2136-3404), Royal Blue (2136-3406), Red (2136-3407), White (2136-3408).
