OVERVIEW

The Elastic No-Twist Neck Cord (2140-15XX Series) offers a simple, affordable way to display ID badges, credentials, or passes during events and short-term activities. Designed with double-ended elastic and nickel-plated barbed ends, it keeps your badge flat and visible throughout the day without twisting or flipping. The barbed end works great for round holes and is not compatible with a slot hole. This lightweight cord stretches comfortably to fit most users, making it ideal for conferences, conventions, visitor management, volunteer programs, and school functions.

KEY FEATURES

- **Budget-Friendly for Events:** Ideal for conferences, conventions, trade shows, visitors, and short-term ID display.
- **No-Twist Design:** Double-ended elastic keeps badges facing forward and readable throughout the day.
- **Comfortable Stretch:** Lightweight 30" elastic cord provides a relaxed, secure fit for all-day wear.
- **Secure Barbed Ends:** Nickel-plated metal tips grip firmly into round chain holes (not compatible with slot hole); sold in packs of 100 for easy distribution.
