Category	Lanyard
Weight	0.2 oz
Colors	Black, Navy Blue, Red, Royal Blue
Customizable	No
Country of origin	China

OVERVIEW

The 2140-540X is a 3/8" (10mm) flat polyester lanyard with plastic SlimClip end fittings on both ends. The cut length is 36" (914mm) prior to assembly. SlimClips are narrow plastic snap closures that eliminate the metallic jangling produced by standard hook and swivel end fittings. In a room full of attendees wearing metal hook lanyards, the constant jingle is audible throughout the space -- SlimClips remove that entirely.

KEY FEATURES

- **Eliminates Metal Jangling:** SlimClips plastic end fittings produce no metallic noise during wear -- the most noticeable difference versus standard hook lanyards in large conference or event settings.
- **Fully Metal-Free and Non-Ferrous:** No metal components anywhere on the lanyard. Suitable for metal detector checkpoints and facilities where metal accessories are restricted.
- **3/8" Flat Polyester Construction:** 36" cut-length. Lightweight and comfortable for all-day event wear.
- **Open-Ended Design:** Non-looped ends allow fast credential attachment and removal at registration desks and check-in stations.
