## OVERVIEW

The BL-34H is a 3/8" flat braid breakaway lanyard with a wide plastic no-twist hook end fitting. The lanyard is fully metal-free and non-ferrous -- no metal components from strap to end fitting -- making it safe for MRI facilities, metal detector checkpoints, and imaging room environments. The cut length is 36" (914mm) with 48-thread count woven construction that is soft and comfortable against the neck. The wide plastic no-twist hook keeps slot-punched IDs and standard badge holders facing forward throughout wear.

## KEY FEATURES

- **Fully Metal-Free and Non-Ferrous:** No metal components anywhere on the lanyard. MRI safe, metal detector friendly, and safe for imaging room environments.
- **No-Twist Wide Plastic Hook:** Keeps slot-punched IDs and standard badge holders facing forward during wear.
- **Safety Breakaway Connector:** Releases when pulled apart and reconnects afterward.
- **3/8" Flat Braid, 48-Thread Count:** 36" cut-length. Soft, comfortable all-day wear.
