OVERVIEW

The SPID-3820 is a two-piece stethoscope ID tag that closes around your stethoscope tubing. The two parts attach together over the tube and lock in place, so the tag is hard to lose once it is on. It is double-sided: one face is flat and round for a sticker, decoration or a custom print, and the other carries a white write-on strip for a name. A tag on the tube is the fastest way to tell your stethoscope from an identical one on a busy unit, and unlike tape it stays legible and stays with the instrument.
