Dimensions	3 3/8 inch x 2 1/8 inch
Weight	varies by option - see options table
Size	100 Pack, 200 Pack, 500 Pack, 1000 Pack
Customizable	No

OVERVIEW

These composite PVC/PET cards are blank white CR80 30 mil card stock for professional ID badge and credential printing. The standard credit-card-size 3 3/8 inch x 2 1/8 inch format is printable on both sides for employee IDs, student IDs, visitor badges, membership cards, and access control credentials. The 60% PVC / 40% PET composite construction gives the cards added heat resistance compared with standard PVC card stock, making them a strong choice for retransfer printers, HDP printers, and lamination workflows. Use them with compatible high-heat ID card printer systems such as Fargo HDP5000/HDP6600, Magicard Prima 4/8, Zebra ZXP Series 9, and similar retransfer/HDP printers.

KEY FEATURES

- **High-Heat Composite Card Stock:** 60% PVC / 40% PET construction helps resist heat-related warping better than standard PVC cards.
- **Ideal for Retransfer & Lamination:** Designed for card-printing workflows that use higher heat, including retransfer, HDP, and laminated ID card applications.
- **Double-Sided Printable:** Blank white CR80 30 mil cards printable on both sides; no magnetic stripe, chip, proximity technology, adhesive backing, or pre-punched slot.
- **100-Card Sleeves:** Shrink-wrapped in 100-card packs for employee IDs, student badges, membership cards, visitor credentials, and other professional card programs.
